## DETAILED ACTION

### *Specification*

1. The abstract of the disclosure is objected to because it is less than 50 words in length. Also, in the last line of the Abstract, it appears that the word "with" should be changed to –without–. Correction is required. See MPEP § 608.01(b).
2. The disclosure is objected to because of the following informalities: In paragraph [0003], line 23, the reference character "11" should be changed to –12—in order to accurately correspond to the drawings. Appropriate correction is required.
3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### ***Claim Rejections - 35 USC § 112***

4. Claim 1 is rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. **The claim(s) must be in one sentence form only.**

Further, there is no clear antecedent basis for "said fixed scooper" as recited in line 3 of claim 1. Also, it appears that the word "composing" (claim 1, line 2) should be

changed to –comprising—in order to make grammatical sense. Note the format of the claims in the patent(s) cited.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 1, as understood, is rejected under 35 U.S.C. 102(b) as being anticipated by Ross.

Ross discloses a method of picking up dog waste and disposing it within a disposable bag (80) that is secured to a fixed scooper portion (20) wherein a filled bag can be released by squeezing a release handle assembly (16,70).

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Shibuya and Skermetta both show waste retrievers having a means for releasing a disposable bag filled with waste.

8. An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in

this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

Applicant is advised of the availability of the publication "Attorneys and Agents Registered to Practice Before the U.S. Patent and Trademark Office." This publication is for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.
